man has finally found: his world has always been

A NEW AGE TEACHING
now being presented throughout the world
tells how it all can be turned right side up--today!

The Divine Principle, as taught by Sun Myung Moon of South Korea, is a comprehensive understanding of the nature of God, man, and the universe--through the eyes of Science and Religion.

A dynamic human movement centering on this philosophy has spread throughout the world. Called the Unification Church, it includes people from many different races, religions, and cultures--who have come together to learn this Principle and to use it to transform themselves and their societies.

Sun Myung Moon recently launched a "One World Crusade" in our country: nearly 100 young people are traveling throughout America spreading news of this revolutionary understanding of age-old truth.

The mass media have called them everything from "New Age prophets" to "Jesus freaks that make sense," but they see their mission as a simple one: sparking a new spiritual awakening in the hearts of Americans.

These "Pioneers" are sharing the Divine Principle with their fellow men on the sidewalks of New York City, in the Ozarks of Arkansas, the deserts of Arizona, and the forests of Washington State.

We'd like to share it with you in Berkeley--today.

UPSIDE DOWN!
