Shine City Project helps to pick up litter at Sunrise Trailhead at Wetlands Park on January 8, 2022.

On January 8, 2022, Shine City Project volunteered at Sunrise Trailhead! Working with both Clark County Wetlands Park and Get Outdoors Nevada staff, our volunteers helped to pick up litter in the area. We had eight volunteers representing Shine City Project.

Overall, the area along the road leading to the trail was heavily littered with glass bottles, food packaging, and other items. In one part, the ground was covered in a sea of broken glass. And in another part, there was a large pile of wire casings.

In the end, with the efforts of all who were present, both within and outside of our Shine City Project group, two large dumpsters were filled! It took a lot of effort and volunteers to help clean up the area, and hopefully, more can be done to help restore the beauty of the area!
