

A Workshop Celebrating Easter with the Young Children

Chamarande, France, 16. April 2017

Nine families gather with their children to celebrate Easter. 18 children from 0 to 7 years old enjoyed the day.

In the morning, a Sunday service was held and children could learn about True Father experiencing the nature, in particular his way of fishing the sea eel with his mouth and teeth. They enjoyed different activities such as coloring, singing songs and making bunny ears. Finally, they had an Easter egg hunt in the yard.

Meetings for the children are really important to create bonding between them from a very young age. Parents can also enjoy the time and share happy moments together.

We already organized previous workshops and gathering. Children are growing so fast and more serious workshops will need to be organized in a near future.
