As an American myself, I never bought into the "America First" policies because it simply is directly opposite of True Parents' Words. This political stance never started with Trump and MAGA since others tried to hide it but it certainly is becoming more obvious.

How should the Unificationists think and teach our children about this "America First" policies in relation to what we have been taught by True Parents? True Father said:

"God has been giving world-level blessings to America for two hundred years, but Americans think these are just for them, for their Christian churches, and for their country. They have forgotten their responsibility to liberate all humankind and promote human well-being by sacrificing America and Christianity. Instead they only think of American belief in their superiority and resort to unilateral thinking centered on its national interests.

God's will is for a globalized America to build a worldwide foundation, even by sacrificing itself and Christianity. But it is going against this and taking a contrary position. This is why America is nose-diving. Families are breaking down, churches are collapsing, the nation is being dismantled and everything is in a total mess. Everything is diseased. (143-189, 1986.3.18)"
