North Thames Holy Community

Lungs takes up oxygen – gives out carbon dioxide  
Tree takes up carbon dioxide – gives out oxygen

Water is the basis for life! - evaporates into clouds...rain!  
Nurture growth - Full circle...  
We are of Ca. 70% water - The Earth has Ca. 70% Oceans

Bees seek nectar!  
Plants seeks to be pollinated!  
In Gods creation there is absolute harmony and  
need for each others!

Strawberries the only fruit with seeds on the outside  
Strawberries have an acid coating that protects the seed  
going through stomachs..

Hummingbird (or mot) fertilizing a plant (budleija)  
Each flower has nectar.

Moon cycles effect many things...  
Moon covers the sun exactly at Solar eclipse!

The metabolism of a an earthworm under the ground is effected by Moon cycles!

The Moon makes Earth a more livable planet by moderating our home planet's wobble on its axis, leading to a relatively stable climate.  
Causes tides, creating a rhythm that has guided humans for thousands of years.

Summary: We have a reciprocity between  
male and female  
mind and body  
Mankind and Nature

We get true value through other people  
valuing us!

”Grandpa when daddy get stressed you don’t  
so I love you!”

That value comes from the grandchild.

Before you lerned to love...your parents loved you  
and so did their parents their children and as all  
previous generations did.

The whole foundation of the universe is the Love of God.

Every cycle in nature is reflected in the same cycle in human relationships.

Home church (360 homes) love them and you have symbolically loved all Mankind.

Animals are programmed through their DNA  
to act as animals all the time.

Humans on the other hand have a capacity beyond DNA  
They can learn to read, play music etc...  
expanding their mind.

Every time you do something well you feel happy.  
Do something for others and you will be  
happier and happier...!
