

## WFWP France meets face to face on the theme of Women and Spirituality

Brigitte Wada  
September 19, 2020

On Saturday 19 September, the Women's Federation for World Peace France made its return to work with a meeting on the theme "Women and Spirituality." Throughout the afternoon, the event brought together about twenty women and a few men at the Espace Barrault, and many people followed it via Zoom.

Together, we addressed the question: How at the beginning of the 21st century can a woman deploy her spirituality throughout her life Journey? In order to better understand the often mysterious but undeniable richness of a feminine spirituality, 3 speakers shared their thoughts and experiences:

Dr. Andrianina ANDRIAMANJATO, Deacon, medical doctor, founder of the association "Peace And Harmony Development," presented her vision of spirituality as a woman, through the testimony of her personal experience on the family, professional, confessional, international and inter-religious levels.

Mrs. Loubna EMEL, founder of 2 associations, "L'Etoile" and "Loban," artist and author of about thirty books spoke to us on the theme "Spirituality, femininity and maternity are they compatible?"

Mrs. Brigitte WADA, President of WFWP-France enlightened us about "God's maternal love."

A snack dinner closed this afternoon of rich and fruitful exchanges.
