

Spread the Holy Spirit-19 Vaccine to love thy neighbor and to forgive your enemies

Trevor Newman
August 11, 2021

What if God were to give you a personal critique review PCR test? Would He find any residue of the Holy Spirit HS-19 in you? If little was found even when the test was magnified by angels searching deep into your heart and still only a small fragment was found, wouldn't you seek a vaccine to boost your receptivity to the Holy Spirit?

Well 2000 years ago a heavenly vaccine was released by Jesus and is available even today. It requires a dose of belief in Christ's blood of salvation and a second dose of studying the Bible. Of course repentance of sin boosters are required as often as necessary. Then you have protection against the arrows of the enemy Satan for the rest of your life. God would have injected you and me with my renewed authority mRNA immunity over the devil which will last you and I for eternity and guarantee freedom in Christ to be seated at His right hand. Let's spread this virus throughout the world and gain humanity's herd immunity.

HS-19 vaccines induce testing of human relationships with respect for effectiveness to love thy neighbor and to forgive your enemies. These tests are closely monitored by your ministering angels.
