

Leda News 315

November 29, 2016

The deer live in the orchard now.

Reporter: K. Date / Translator: JG & MG

Leda is in the rainy season so it is raining frequently. Mr. Omoto takes care of the Capybaras and deer and Mr. Nakamura helps with repairs and maintenance on the Pacu farm. Mr. Beniya is active cleaning the grounds while Mr. Yoshimura helps with farming. Their efforts and spirit are giving new life to Leda.

Recently the steel framing and the brickwork was finished on the shrimp farm.

The salt water underground in Leda has a higher salt content than ocean water and does not contain harmful heavy metals and ammonia. This insight was achieved through Mr. Okusako's research and gives us great hope.

Mr. and Mrs. Fujiwara in front of the residence before they left on Nov. 22nd. During Hoon Dok Hoe,

Mr. Fujiwara emphasized the significance of the Leda Settlement's support of True Mother.

<Left> Mr. Beniya, Mr. Owada, Mr. Nakamura and Mr. Yoshimura checking and cleaning the all of vacuums.

<Right> After Tosa left, Mr. Omoto takes care of Capybaras.

<Left> Mr. Yoshimura prepares a flower bed to plant seeds on the first farm area where he actively helps.

<Right> 25th, Tosa (right) left by boat on the Aquidaban. Okusako gives Tosa a warm send off.

In front of the cafeteria in the training center:
Caranday Palm tree (*Copernicia Alba*) is starting to bare
fruits.
