

Born to Live Eternally

2 Day Seminar of Unificationism

Helsinki, Finland, 24. – 25. May 2014

Uplifting and down-to-earth presentations on essentials of life were given by an elder brother Johannes Stampf from Austria to an audience of about 40 persons, mostly Unificationists.

Having studied most known writings on spiritual world he affirmed that the teachings of the True Parents, and supported by messages from Heung-Jin Nim and Dr. Sang

Hun Lee, are the highest teaching in this field, because they promote the family salvation and creation of the original family ideal based on loving couple and family relations.

It was encouraging to recognize that this vast topic could be dealt in such a systematized way and that it has relevance to our daily lives.

Escapist spirituality, not to speak of all the materialistic, self-centred life styles in the present fail the point that a genuine love substantiated in our family is the basis of our existence here and for eternity. And we should guide other people to discover this, too.

An important part of this two-day gathering in the modern community center of the Myllypuro

(Mill Creek) suburb of Helsinki, was the sharing among brothers and sisters and friends, young and old, during the breaks over refreshment and at the end of the day.

These presentations on the eternal dimension of our existence were deeply rooted in the teachings of the True Parents, and one could experience a rejuvenated sense similar to the early encounters with the Divine Principle.
