

CARP and HARP Summer Camp

Lisbon, Portugal, August 1 - 6, 2018

By Sergio Neto

Following the motto of the workshops and activities taking place at the European level for young people, we should follow the same line and decided to focus the conferences, activities, discussions, HDK and the interaction between the young people in strengthening of their inner self, to reinforce their convictions and to realize that by strengthening their spirit by creating a closer relationship with God, being

constant in their life of faith, knowing True Parents through their actions are also directing their future and creating a good foundations and good tools as they grow up.

The motto of this summer camp workshop was "Step by Step we got stronger", were present 30 young people of different ages between elementary school and university. Although they had times according to age, such as the time of conferences and discussions, there were also times

when all the young people joined together, trying to get the older ones to take care of the little ones, like the fun at the beach, washing the dishes or in group activities and they saw as younger brothers.

It was a good day spent with a lot of fun and they could be closer to those who have the same goals and the future with hope and joy.

A good holiday for all members from all over the world.
