

National Environmental Project in Tallinn, Estonia

Avo and Olga Martinson

May 1, 2019

Blessed families have participated and are still planning to participate in different places.

Basically, this is cleaning the area from garbage, as well as improving the environment, building arbors, track in the park, and so on...

On the way, interesting games and tasks were organized, as well as everyone was waiting for a delicious lunch.

This is a good opportunity to take care of nature and have fun together!
