

Couples' Relationship and Being Parents To Give Guidance to 2nd Generation Blessed Couples

Manantial del Corazon, Spain, November 23 - 25, 2018

By Francesca Stabile

This last weekend, we had a really nice couples' workshop in Madrid. There were 7 couples as participants and all of them with their children. We had the pleasure of having with us Heidi Mayr (Austria's FFWPU president) as lecturer of the workshop.

On Sunday the main theme was the relationship in the couple. We had

some guidance first and then group sharing and exercises. We also had the nice opportunity of having night date without kids, a candle light dinner where each couple had his own table and could talk about different themes with some nice love songs as background music.

On Sunday we focused on "how to educate our children" with some guidance and discussions. Every family and every child is different so it

was interesting sharing some ideas and situations so that we can understand, grow and help each other.

All couples had a good experience and just being there and share time together has been nice.

Thanks to Heidi for coming to Madrid and share this precious time with us helping with her experience.
