Online Workshop: Building a World of Peace in a Woman's Way: a Guide to Empowerment and Peace Leadership

This Curriculum Education Module 3 workshop was held for the first time in Spain. It was presented by Carolina Anais Vega, a young woman from the Unification community who liked the content very much and accepted to present it.

There were about 11 women from the Unification community and one intern with WFWP Spain.

The objective was to have a first experience with presenting the content and receive feedback from the participants for improvement.

There have been some nice comments about it and good and constructive feedback thus far.
