

WFWP Madrid, Spain: International Women's Day Round Table

Marcia de Abreu

March 10, 2022

WFWP Spain held an event to mark the celebration of International Women's Day on a topic centered on the war initiated by Russia with the invasion of Ukraine on February 24, 2022.

With the purpose of showing solidarity, we invited several representatives of associations founded by Ukrainian people in Spain and other noted members to speak: They all shared their anguish, state of shock, and sadness for what is happening.

Some of them still have their children and other relatives back in their country and emphasized the fact that life there is completely destroyed: no house, no work, no old friends, nothing.

We used this opportunity to read short selected sentences by the founders of WFWPI between each speaker's sharing, and at the end, we invited all to join in prayer for the bloodshed to cease.

Around 30 people participated in this meaningful event due to the current situation of war now.
