

## To influence the world, use the names of people who already impact the world

Daryl Kwon Kabeya

October 16, 2021

To influence the world, you must use the names of people who already impact the world. For example in the Democratic Republic of Congo we have pastors like Marcello Tunasi that The Continental Staff including Prophet Radebe can go to testify and even the Prophet can invite him to his Church to tell him about the Divine Principle and even bring him to Korea for the better understanding of things.

Moonists are waiting to build their own name to influence when it may take time because we lack unity and consideration of other people's ideas.

We have prophets in the Democratic Republic of Congo like Prophet Joel Francis Tatu that we can proceed equally as I described above.

Moonists are not a Religion but rather a Heavenly education and tradition for the establishment of a world of peace of universal values, mutual and shared prosperity and interdependence.

We don't have Religion or Church, we are universal that's what we have to do to influence the world.
